

Colline x Terrano

Design perfectly
Create consistently
Offer comprehensively
Hit precisely

In the hasty world with sounds coming from everywhere, silence and light create a perfect fusion. Together, they make places conducive to finding inner balance, supporting rest and concentration. This idea

gave birth to the Colline x Terrano acoustic luminaires, which provide perfect lighting and soundproofing of the space, adapting the conditions to individual needs.

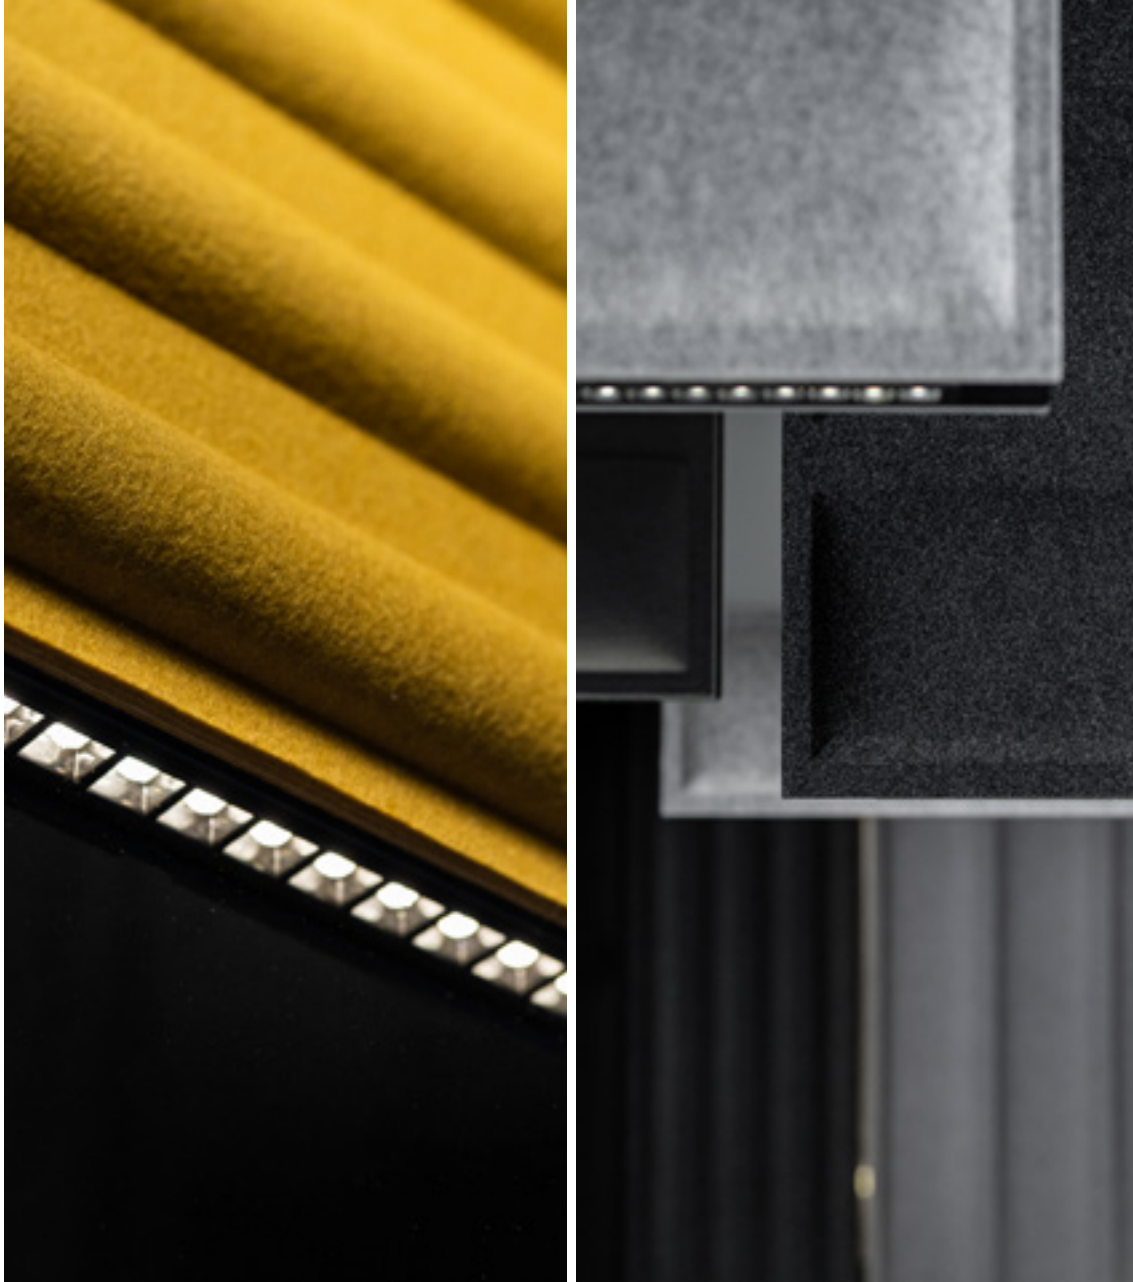

Colline x Terrano

DESIGNED by Aleksandra Mętlewicz & Mateusz Gaczkowski & Lena Lighting

red**dot** winner 2023

Harmony of the senses

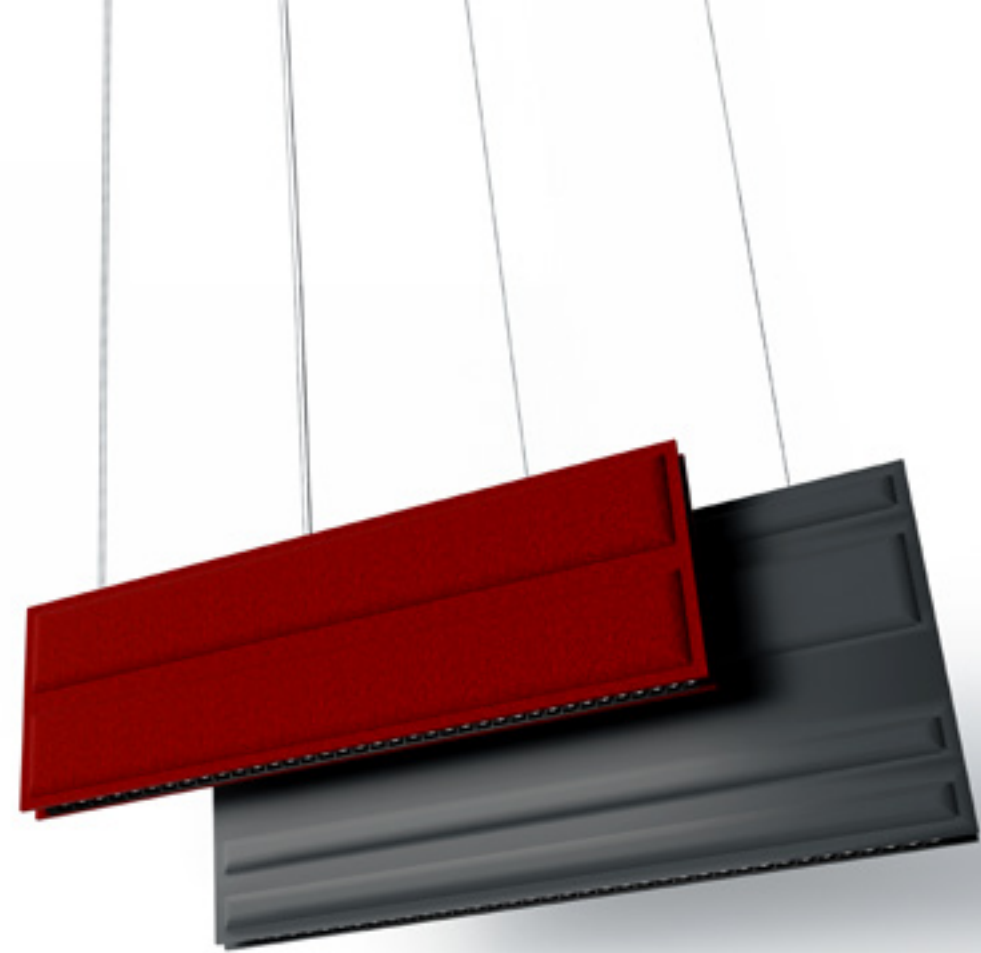

Colline x Terrano care about comfort and a sense of security every day. It is the light that makes it possible to explore the world with all its richness and spend time in a space conducive to celebration or work. Silence, on the other hand, soothes the senses and allows you to indulge in deep relaxation, ensuring balance.

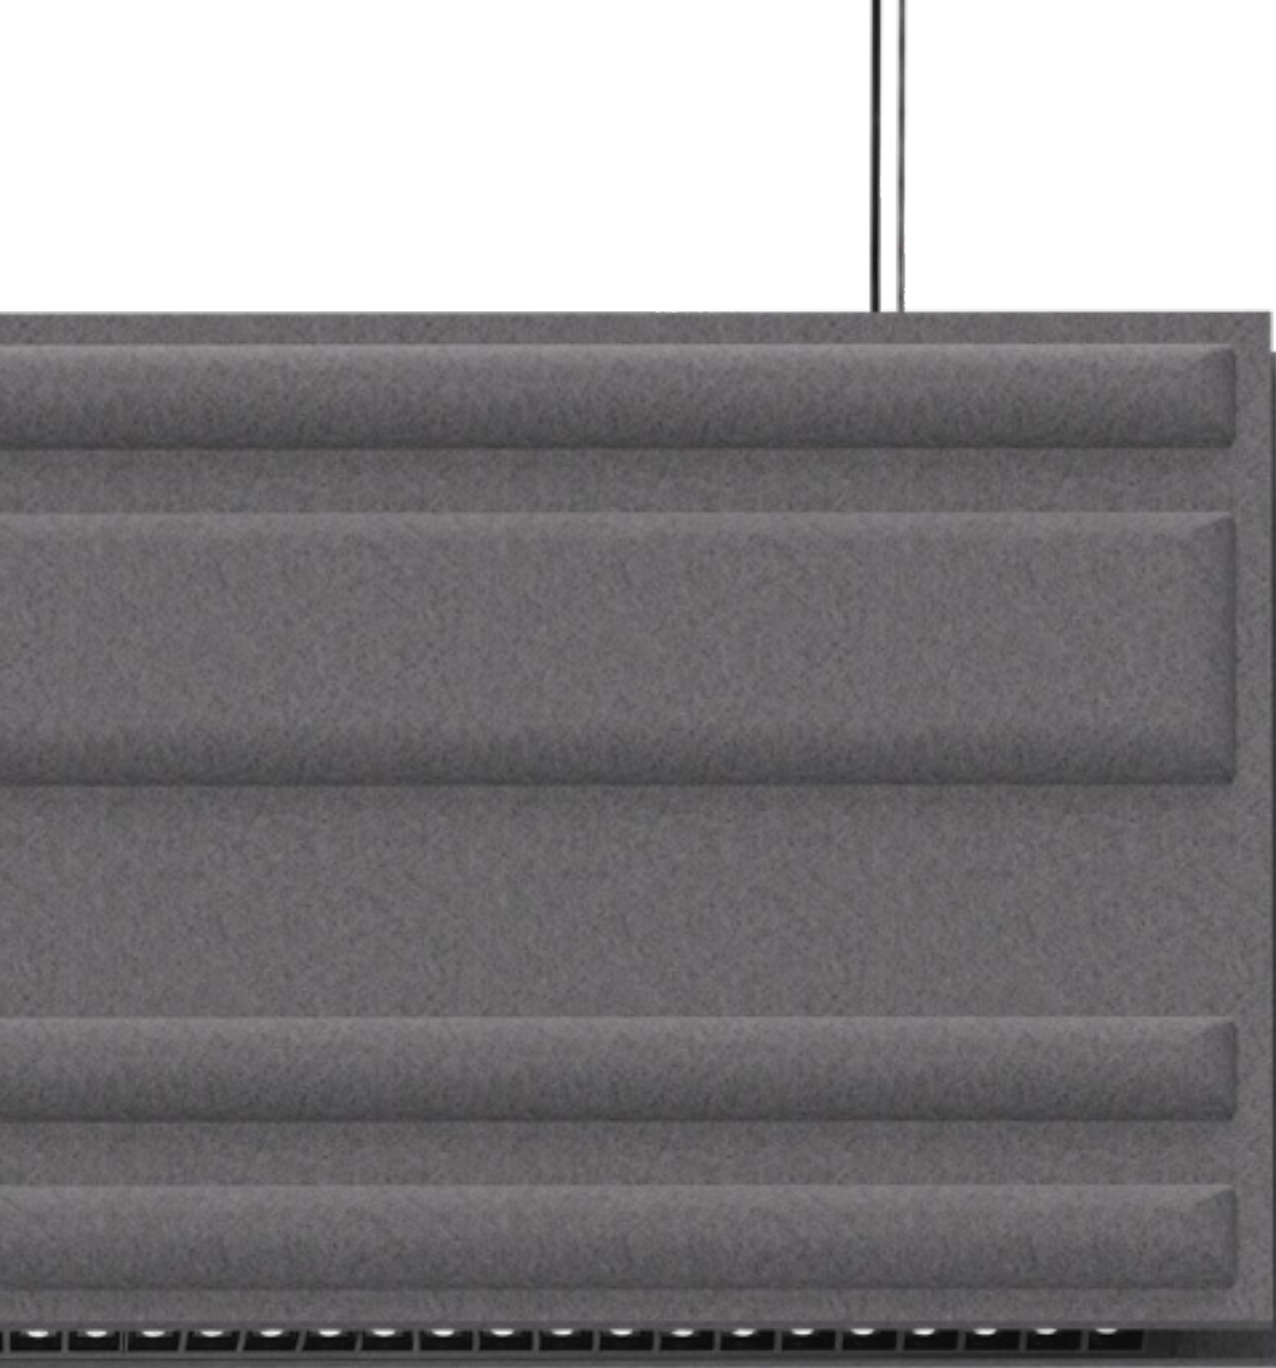

"We believe that silence allows us to experience the new. But only the light is capable of bringing to the surface all its best. To make silence almost tangible. Visible. More sonorous. Multidimensional. Silence and light taken together create a perfect synergy."

Light

Today, light is something more than just a functional element of everyday life. It is a constructor of aesthetic space, a creator of mood and well-being. Light cares about emotions. Discovers the beauty of interiors. It cherishes safety of work, rest and movement. Colline x Terrano acoustic luminaires bring genuine innovation to the space.

The LED modules used in Colline x Terrano emit light in two standard, eye-friendly colours of 3000 and 4000 K. The low UGR, ranging from 12-19, eliminates the glare effect, which translates to great comfort.

— Acoustics

The design of Colline acoustic panels has been inspired by nature and contemporary art. Colline means hill in French. The analogy is easy to see, because the panels themselves can create a system consisting of folds, which fall and rise again and again, just like the fields of Provence. The light coming out of them introduces a blissful, gentle and cosy atmosphere. With unlimited colours and shapes, Colline x Terrano luminaires constitute an innovative interpretation of nature and art. Colline panels provide the highest level of sound absorption.

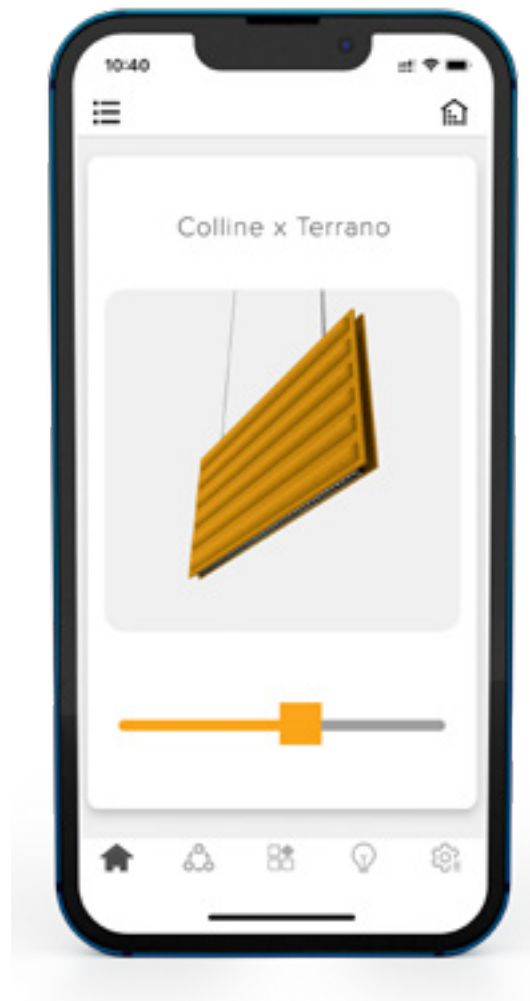

Products

The product provides a spectacular effect of arrangement, while caring of the senses of hearing and sight.

Colline x Terrano luminaires are not only elegant, but also soft to the touch and entirely safe for the health. The acoustic panels themselves are made of the highest quality natural felt (100% wool) and synthetic felt, characterised by sound-absorbing acoustic properties. They also have an acoustic filling, so that the panels can boast a high class of sound absorption. It is possible to choose an option featuring the NanoFelt Ag technology, which creates a microbial barrier. The nano-silver particles ensure that bacterial particles do not accumulate on the surface of the panels, which allows you to create not only an aesthetic, but also a healthy space. LED modules from Lena Lighting save up to 50% of electrical energy consumption.

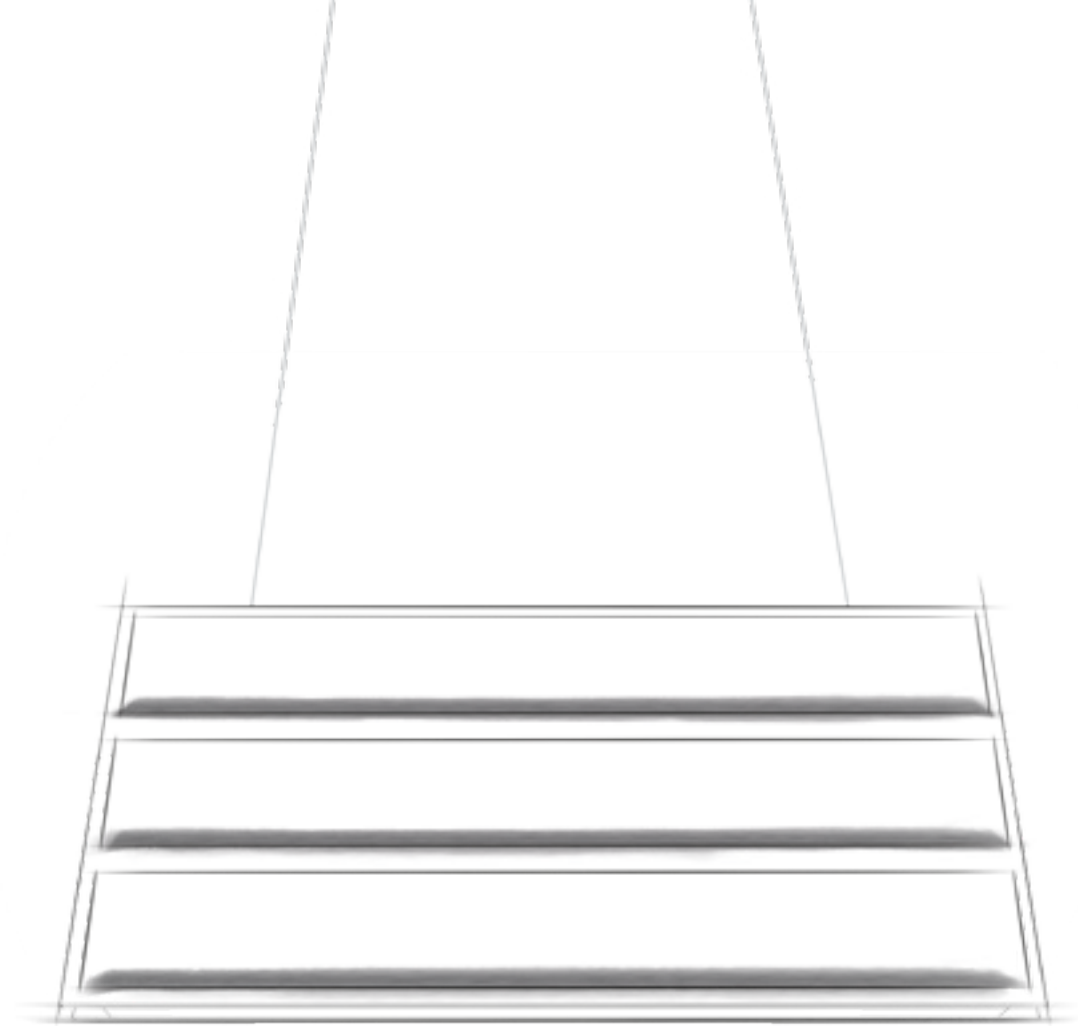

Assembly and disassembly of acoustic luminaires is efficient, and the vast majority of components are recyclable. This way, the brands pay tribute to nature, which constantly inspires them in creating new products.

Lighting control

Colline x Terrano are also offered in DALI-controlled versions, allowing you to remotely adjust light intensity to current conditions. Versions compatible with the Clue In system will make creating your dream interior a real pleasure. Lena Lighting's proprietary control system provides a wide range of functionalities, such as setting lighting scenes, dimming or programming the lighting parameters of individual or grouped luminaires from the mobile application or the control panel.

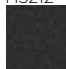

Personalisation possibilities

The modular design of the Colline x Terrano luminaire translates to a wide range of personalisation options: from the choice of material, size and colour of the panel, colour of light, rich design, to a number of intelligent functions, such as DIMM DALI control, allowing for dimming and brightening the light.

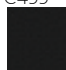

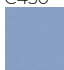

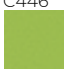

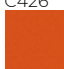

The colourful block of panels can not only effectively soundproof the space, but also freely decorate the interior, adorning it with a modern flair.

Follow your vision

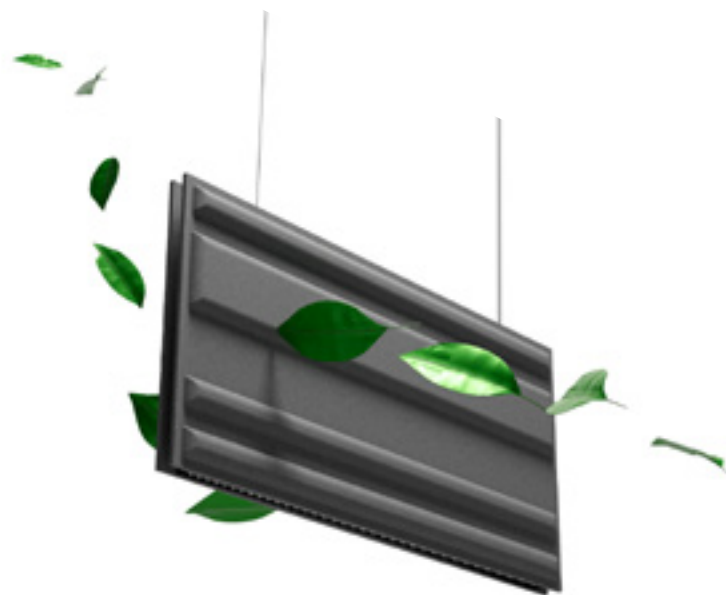

A well-designed space matters. It provides high comfort of everyday functioning in a reality abounding with visual and sonic stimuli. The pleasant atmosphere, tailored to individual needs, conducive to both work and rest, will be created by light and... silence.

The Colline x Terrano luminaires combine elegant, sophisticated design, energy-saving lighting and top-class sound-absorbing components. The Colline x Terrano luminaires are intended to create places conducive to work and rest, as well as to tackle everyday challenges of the day and night.

Inspiring solutions

Colline x Terrano, created in cooperation with the Acustio brand, are the first project of this type in our portfolio. These are multifunctional products, which provide not only a phenomenal interior arrangement and effective soundproofing of the room, but also light which does not strain the eyesight and makes rest and work more pleasant. Synchronised with the appropriate software, Colline x Terrano acoustic luminaires will create unique lighting effects, tailored to individual needs. In short, it is a product that responds to the growing requirements of both public and private spaces.

The awareness of how important environmental protection behaviour is for us and future generations motivates us to put maximum effort to offer the highest quality, energy-saving products, as well as to ensure that the entire production process and the technology used in it do not have a negative impact on the ecosystem.

Our efforts and their effectiveness have been confirmed by the ISO 14001 certificate. This means that Lena Lighting has successfully implemented an environmental management system. The overall goal of this system is to create conditions for the functioning of the enterprise in order to minimise the negative impact on the natural environment. We have already succeeded, but we are going to continue our journey and invest in technology and knowledge aimed at care for the natural environment.

Cooperation with Acustio

Lena Lighting's cooperation with the Acustio brand began during the Red Dot Design Awards 2022. The winners met at the official gala then. Soon after, the brands began work on the prototype of the Colline x Terrano acoustic luminaires, combining unique design with extensive functionalities. The luminaires debuted for the first time at the Orgatec fair in Cologne. Now they are found in the portfolio of both brands.

01 / 02

Lena Lighting is a leading Polish manufacturer of highly energy-efficient lighting and environmentally friendly, comprehensive lighting systems. The brand's production is based on modern LED module technology and its products feature intelligent solutions that reduce electricity consumption. The brand's products – winners of the Green Design Award and the double Red Dot Design Award – are famous for their impressive performance and distinctive design.

02 / 02

Acustio is a Polish brand whose mission is to improve the quality of life of people from various backgrounds. The acoustic solutions offered by the brand are used in office, public and private spaces around the world. Research shows that sound-absorbing panels significantly improve the concentration, efficiency and well-being of users. Acustio products have been recognised by the most prestigious competitions in the world of design, e.g. Red Dot, iF and New York Design Awards.
